NOTES TO FINANCIAL STATEMENTS JUNE 30, 2021 (UNAUDITED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Organization: Manor Investment Funds (the “Trust”) is a Delaware Business Trust, (effective January 1, 2012) comprising of Manor Fund, Growth Fund and Bond Fund (collectively the “Funds”), and is registered under the Investment Company Act of 1940, as amended, as an open-end diversified management investment company. The Trust was originally incorporated in the Commonwealth of Pennsylvania on September 13, 1995 and was dissolved by domestication in Pennsylvania on January 3, 2012. The primary investment objective of each of the Funds follows: Manor Fund – long-term capital appreciation and moderate level of income, investing primarily in common stocks of large corporations in the United States; Growth Fund - long-term capital appreciation, investing primarily in common stocks of U.S. corporations; Bond Fund - current income, investing primarily in U.S. Government obligations.

The following is a summary of the significant accounting policies followed by the Funds in the preparation of their financial statements. The Funds are investment companies and follow the accounting and reporting guidance of Accounting Standards Codification Topic 946 applicable to investment companies.

Security Valuation: All investments in securities are recorded at their estimated fair value, as described in Note 2.

Federal Income Taxes: The Funds make no provision for federal income or excise tax. The Funds intend to qualify each year as “regulated investment companies” (“RIC”) under subchapter M of the Internal Revenue Code of 1986, as amended, by complying with the requirements applicable to RICs and by distributing substantially all of their taxable income. The Funds also intend to distribute sufficient net investment income and net capital gains, if any, so that they will not be subject to excise tax on undistributed income and gains. If the required amount of net investment income or gains is not distributed, the Funds could incur a tax expense. Therefore, no federal income tax or excise provision is required.

The Funds recognize the tax benefits of uncertain tax positions only when the position is more likely than not to be sustained, assuming examination by tax authorities. Management has analyzed the Funds’ tax positions and concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years (2017-2019) or expected to be taken in the Funds’ 2020 tax returns. The Funds identify their major tax jurisdiction as U.S. Federal, however the Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next 12 months.

The Funds recognize interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the six months ended June 30, 2021, the Funds did not incur any interest or penalties.

NOTES TO FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2021 (UNAUDITED)

Distributions to Shareholders: The Funds intend to distribute to their shareholders substantially all of their net realized capital gains and net investment income, if any, annually. Distributions will be recorded on ex-dividend date.

Security Transactions and Investment Income: The Funds follow industry practice and record security transactions on the trade date. The specific identification method is used for determining gains or losses for financial statements and income tax purposes. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Discounts and premiums are amortized over the useful lives of the respective securities when determined to be material. Withholding taxes on foreign dividends will be provided for in accordance with the Funds' understanding of the applicable country's tax rules and rates.

Use of Estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

Subsequent Events: Management has evaluated the impact of all subsequent events through the date the financial statements were issued and has determined that there were no subsequent events requiring recognition or disclosure in these financial statements.

2. SECURITIES VALUATIONS

Processes and Structure

The Funds' Board of Trustees has adopted guidelines for valuing securities including in circumstances in which market quotes are not readily available and has delegated to the Adviser the responsibility for determining fair value prices, subject to review by the Board of Trustees.

Hierarchy of Fair Value Inputs

The Funds utilize various methods to measure the fair value of most of their investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation techniques used to measure fair value. The three levels of inputs are as follows:

- *Level 1.* Unadjusted quoted prices in active markets for identical assets or liabilities that the Funds have the ability to access.
- *Level 2.* Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments in active markets, interest rates, implied volatilities, credit spreads, yield curves, and market-collaborated inputs.

NOTES TO FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2021 (UNAUDITED)

- *Level 3.* Unobservable inputs for the asset or liability to the extent that relevant observable inputs are not available, representing the Funds' own assumptions about the assumptions that a market participant would use in valuing the asset or liability at measurement date, and that would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Fair Value Measurements

A description of the valuation techniques applied to the Funds' major categories of assets and liabilities measured at fair value on a recurring basis follows.

Equity securities (common stocks and real estate investment trusts). Securities traded on a national securities exchange (or reported on the NASDAQ national market) are stated at the last reported sales price on the day of valuation. To the extent these securities are actively traded, and valuation adjustments are not applied, they are categorized in level 1 of the fair value hierarchy. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, Exchange Traded Funds, and the movement of the certain indexes of securities based on a statistical analysis of the historical relationship and that are categorized in level 2. Preferred stock and other equities traded on inactive markets or valued by reference to similar instruments are also categorized in level 2.

U.S. government securities. U.S. government securities are normally valued using a model that incorporates market observable data, such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations. U.S. government securities are categorized in level 1 or level 2 of the fair value hierarchy, depending on the inputs used and market activity levels for specific securities.

Short-term investments. Investments in other open-end investment companies, including money market funds, are valued at the investment company's net asset value per share. These securities will be categorized Level 1 of the fair value hierarchy.

average net assets for the Bond Fund. The agreement also includes an administrative fee not to exceed 0.50%, 0.24% and 0.45% of average net assets for the Manor Fund, Growth Fund, and Bond Fund, respectively. For the six months ended June 30, 2021, the Advisor earned advisory fees from the Manor, Growth, and Bond funds of \$30,144, \$49,705, and \$4,265, respectively. As of June 30, 2021, the Manor, Growth, and Bond Funds each owed the Advisor advisory fees of \$5,251, \$8,448, and \$738, respectively. Administrative Shareholder Servicing Fees

As of August 25, 2018, the Trust entered into an Administrative Services Agreement under which the Advisor provides certain services to the Trust including, but not limited to: accounting, recordkeeping, and portfolio administration of the funds; preparation, distribution, and filing of required reports; managing operational requirements and service providers; organizing and managing the Board of Trustees; and providing marketing and distribution services. Under the Administrative Services Agreement the Advisor earns a fee of 0.05% of net average assets of the Trust. This administrative shareholder services fee is included in the ordinary expenses of the Trust on an annual basis, billed monthly. The fee may be waived for assets in any fund series during periods that the Advisor serves as investment advisor to that series. For the six months ended June 30, 2021, no fees were billed or accrued for the Advisor under this agreement.

As Administrator to the Trust, the Advisor also oversees the third-party service providers. The Advisor pays all expenses related to management and administrative support for the Funds, including those third-party services currently under contract, as approved by the Board. The Advisor also pays certain financial institutions (which may include banks, brokers, securities dealers and other industry professionals) that charge a fee for providing distribution related services and/or certain administrative functions for the Fund shareholders.

5. TAX MATTERS NOTE

As of December 31, 2020, the tax basis unrealized appreciation (depreciation) and cost of investment securities, including short-term investments, were as follows:

	<u>Manor Fund</u>	<u>Growth Fund</u>	<u>Bond Fund</u>

Each Fund's distributable earnings on a tax basis are determined only at the end of each fiscal year. As of December 31, 2020, the Fund's most recent fiscal year-end, the components of distributable earnings on a tax basis were as follows:

	<u>Unrealized</u>	<u>Undistributed</u>	<u>Capital Loss</u>	<u>Total</u>

As of December 31, 2020, the Bond Fund has capital loss carryforwards available for federal income tax purposes, which can be used to offset future capital gains, as follows:

Long-term non-expiring	\$ (5,977)
Short-term non-expiring	\$ (3,238)
Total	<u>\$ (9,215)</u>

The Bond Fund utilized \$2,173 of its long-term capital loss carryforward from prior years.

The Growth Fund has recorded a reclassification in the capital accounts. As of December 31, 2020, the Fund recorded permanent book/tax differences of \$320 from net investment loss to paid-in-capital. This reclassification has no impact on the net asset value of the Fund and is designed generally to present undistributed income and net realized gains on a tax basis, which is considered to be more informative to shareholders.

Ordinary income and long-term capital gain distributions are determined in accordance with Federal income tax regulations, which may differ from the character of net investment income or net realized gains presented in the financial statements in accordance with U.S. GAAP.

MANOR INVESTMENT FUNDS

NOTES TO FINANCIAL STATEMENTS (CONTINUED) JUNE 30, 2021 (UNAUDITED)

For the six months ended June 30, 2021, the Manor, Growth, and Bond Funds did not pay a dividend.

Long-term Gain	\$ 61,530	\$ 1,277,038	\$ —

6. INDEMNIFICATIONS

In the normal course of business, the Funds enter into contracts that contain general indemnifications to other parties. The Funds' maximum exposure under these contracts is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. The Funds expect the risk of loss to be remote.

7. MARKET RISK

Overall market risks may also affect the value of the Funds. Factors such as domestic economic growth and market conditions, interest rate levels and political events affect the securities markets. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions and depressions, or other events could have a significant impact on the Funds and their investments and could result in increased premiums or discounts to the Funds' net asset value, and may impair market liquidity, thereby increasing liquidity risk. The Funds could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments.

An outbreak of infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now been detected globally. This coronavirus has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

Expense Example

As a shareholder of Manor Investment Funds, you incur ongoing costs which consist of management fees and administrative expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Funds and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2021 through June 30, 2021.

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in these Funds and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.
